Deliver High-Performance Imaging Solutions

General Dynamics Advanced Information Systems has created a new organization, General Dynamics Global Imaging Technologies, to deliver high-performance imaging solutions to defense, homeland security, law enforcement and commercial customers worldwide. General Dynamics Global Imaging Technologies will include the Axsys Technologies division, completing the integration of Axsys into the General Dynamics family.

Building on Axsys Technologies' unique portfolio of electro-optical infrared (EO/IR) motion control and cameras systems, General Dynamics Global Imaging Technologies offers integrated solutions to the most-demanding customer challenges.

General Dynamics will also introduce a new naming convention for its cameras, camera systems and pan-tilt systems to allow customers to more easily identify the proven solutions that will meet their mission's needs.
